

Neurotech launches Mente Clinic

- *Virtual clinic enables clinicians to extend their practice*
- *Early Adopter Programme with special discount for participants*
- *Opportunity to contribute to ongoing validation projects*
- *Mente App available on iOS and Android platforms*

Malta & Perth, Australia – 5 June 2019 – Neurotech International Limited (ASX: NTI) (“Neurotech” or “the Company”) today announced that it has launched a pilot version of Mente Clinic, a virtual clinic that enables clinicians to interact with their Mente patients and remotely monitor their progress.

Accessed via www.menteclinic.com, appointments can be set up with clients via video conferencing, and usage monitored remotely. Our goal is to enable clinicians to extend their practice, provide a service to clients in areas where access to a clinic is restricted, and monitor Mente clients’ progress.

Neurotech has launched its Early Adopter Program in all geographic regions where the Mente can be used. Early Adopters will benefit from substantial discounts on Mente’s Starter Pack and subscription model. There are no contractual obligations but Neurotech will encourage early adopters to provide ongoing feedback on usability and the progress registered by users.

CLINIC IS OPEN TO PARENTS

Parents also have the option to join the Early Adopter Program, and through a simple process, they can book consultations with a Mente specialist or order a starter pack comprising a bundle of therapy sessions and the Mente headband.

MENTE IOS NOW AVAILABLE

The public release version of the Mente iOS application is now available on the App Store. Mente clients can now choose between the iOS or Android versions of the app.

Peter Griffiths, CEO and Managing Director, said. “Following the launch of the subscription model in March, we are very excited about Mente Clinic and our Early Adopters Program. We want our Early Adopters to play a leading role as we work to expand the reach of Mente. Through their participation in this program, they can benefit from introductory pricing and help us by providing ongoing feedback on Mente and its benefits.”
